Contents

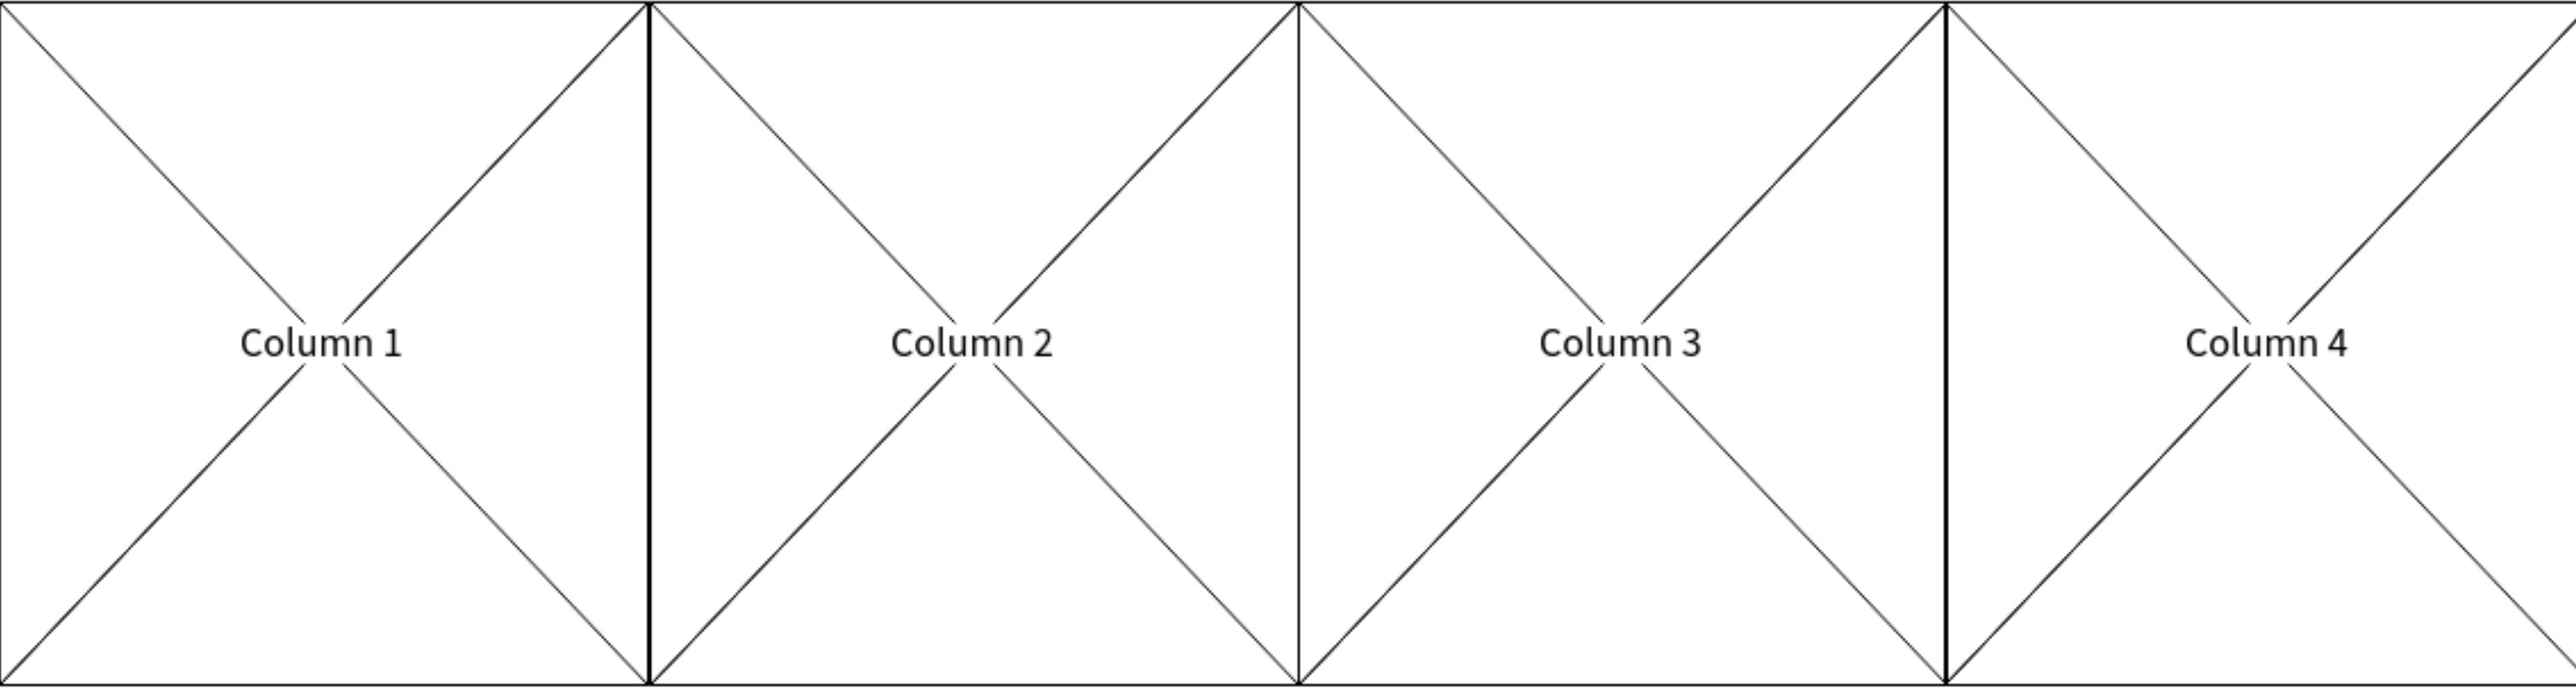

1. Mobile

2. Desktop

The diagram illustrates a mobile layout structure. It features a central horizontal line segment that divides the space into two equal halves. From each end of this central line, two diagonal lines extend outwards towards the corners of the frame, creating a shape reminiscent of a diamond or a wide V. The top half of this diamond shape is labeled "Column 1" and the bottom half is labeled "Column 2". This visual representation indicates that the content is divided into two equal-width columns, which is a common layout for mobile devices.
